SHAPE  
YOUR  
FUTURE

## **Apprenticeship Engineering Mechanical - (Fitter and Turner)**

**(1st September 2020) (visit Seek website)**

**Bob Jolly & Co**

**Work with your hands, work with your mind and work with varied and interesting machinery to create all kinds of items from all kinds of materials.**

**Bob Jolly & Co are well known within the Engineering Industry for a very diverse range of services such as manual and CNC machining on lathes and milling machines. We also provide Gear Cutting Services along with a wider range of capabilities.**

**As an apprentice you will be exposed to all aspects of our services and spend time in each and every area of our machining facility.**

**our services and spend time in each and every area of our machining facility.**

**The apprenticeship is a 4-year, workplace-based training contract with external course/module training undertaken throughout the term of the apprenticeship.**

**The art of using manual lathes, milling machines, grinders, drill presses, gear cutting machinery, computer controlled machinery and computers' just to name a few, is a highly required skill set that is becoming harder and harder to find these days, leaving young tradespeople in a great position with many opportunities in the future.**

**At Bob Jolly and Co you could be making a part for a race car or from a farmers tractor, it could be something from a power station or a winery. It is such a wide and interesting Customer base that we work with, resulting in new jobs and new opportunities coming in each and every day.**

**Applicants require great communications skills, a sound understanding of basic mathematics and an eagerness to learn/try new things on a daily basis.**
